

*Clifton Antiquarian Club Lansdown Lecture*

# Zooarchaeology

**The Study of Animals in Archaeology**

**With Steve Tofts, Clifton Antiquarian Club**

*Monday March 18th at 7pm*

*The Lansdown, 8 Clifton Road, Clifton, BS8 1AF*

Animal bones found in excavations are too often disregarded. A study of their remains and even their depictions can tell us such a lot about the human society with which they were associated.

This presentation will include a basic overview of zooarchaeology and take a look at some local examples.

Please bring along any bones you are curious about and I will try to identify them.
